

# ***I- 680 Soundwalls Update Project Complete!***

On November 15, 2005, the City of Milpitas, California Department of Transportation (Caltrans) and the Valley Transportation Authority (VTA) celebrated the completion of the I-680 Corridor Project.

This project included soundwall construction along the west side of I-680 from Calera Creek north of Jacklin Road to Calaveras Boulevard. These soundwalls will reduce current and future noise levels as identified in the environmental document for the project. Funds for the walls were provided by the State, the Alameda County Congestion Management Agency (ACCMA) and the Santa Clara Valley Transportation Authority (VTA).

The City of Milpitas will continue to research funding opportunities for soundwalls north of Calera Creek adjacent to the Sunnyhills Neighborhood. The possibility for new soundwalls on the east side of I-680 will continue within the next few years, as transportation agencies are planning to install an additional north bound lane north of Calaveras Blvd. Milpitas has requested that soundwalls on the east side of the freeway be provided along with this construction. This issue is not yet resolved, but Milpitas staff will continue to advocate for these walls!
